MEMORANDUM FOR: AD/OSA

SUBJECT : The Potential Effect of LASERS on  
the CORONA and OXCART Programs

Upon studying the subject memorandum, Dr. Scoville and I have come to the same general conclusion. You will see his notes penciled in the margin. In general, we feel it is much too early to worry about this subject in a technical development sense. As Dr. Scoville suggests, you should ask OSI to keep alert on any method which may be hazardous to the OX program. We cannot concur in the suggestion for the cover story.
